## **DETAILED ACTION**

#### Election/Restrictions

Applicant's election without traverse of Group 1, claims 1-4 in the reply filed on 4/19/09 is acknowledged.

#### Information Disclosure Statement

1. The information disclosure statement filed 3/8/09 and 4/30/07 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The office did not receive a copy of JP 64-071399 and WIPO 2004/013977. Also there was no English abstract provided for CN 86108791A and CN 2070556U. It has been placed in the application file, but the information referred to therein has not been considered.

# Claim Objections

1. Claim 3 is objected to because of the following informalities: Claim 3 recites "...in which both the vibration conduction microphone and the speaker enclosure are waterproof". The specification teaches of a speaker enclosure that is waterproof but not microphone (See page 7, lines 5-28). Appropriate correction is required.

## Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claim 3 recites "...in which both the vibration conduction

Art Unit: 2614

microphone and the speaker enclosure are waterproof". The specification teaches of a speaker enclosure that is waterproof but not microphone (See page 7, lines 5-28). The specification lacks antecedent basis for the vibration conduction microphone being waterproof.

## Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites that " when the support structure is fastened to the safety helmet, ...the speaker enclosure come into contact with a rear of a wearer's head...". The examiner asserts that Figure 9 indicates that the speaker enclosure is coming in contact with the side of the user's head but near the rear.

  Additionally, it does not make sense to have the speaker at the rear of the user's head. This would impede the user's ability to hear and understand what was being spoken. It is not clear to the examiner what is meant by rear. Does the applicant really mean side of the user's head? Clarity is needed. The examiner has interpreted this as the case.

## Specification

Art Unit: 2614

# Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1,2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Locarno et al. (US 6,298,249).

Regarding claim 1, Locarno discloses a communication apparatus (Figures 1-6) including:

a support structure that is fastenable to a safety helmet (nape device 12; column 3, lines 36-43);

a vibration conduction microphone that is carried by the support structure (bone microphone 18, Figure 1; column 3, lines 39-43); and

a speaker enclosure (speaker 20, Figure 1; column 3, lines 40-46) that is also carried by the support structure, the vibration conduction microphone and the speaker enclosure being positioned so that, when the support structure is fastened to the safety helmet, the vibration conduction microphone and the speaker enclosure come into contact with a side of a wearer's head, in use.

Art Unit: 2614

All elements of claim 2 are comprehended by the rejection of claim 1.

Claim 4 is rejected using Locarno as applied above to claim 1 (helmet 10, Figure 1; column 3, lines 35-38; all other features are as shown in rejection of claim 1).

## Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Locarno et al. (US 6,298,249).

Locarno fails to teach that the vibration conduction microphone and the speaker enclosure are waterproof. The examiner takes official notice that waterproof housings are well known in the art. It would have been obvious to modify Locarno so that the microphone and speaker enclosure are waterproof so that the speaker and microphone can be protected from the elements.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DEVONA E. FAULK whose telephone number is (571)272-7515. The examiner can normally be reached on 8 am - 5 pm.

Art Unit: 2614

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin can be reached on 571-272-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
